Key Issues to Address

- Insufficient availability of adult education programs;
- Need for innovation in adult education programs;
- Inadequate academic, social, and financial supports for students;
- Inconsistency across the K-12 and community college districts regarding assessments for placement;
- Lack of a common accountability approach for monitoring student progress; and,
- Limited regional coordination.

Recommendations

- Increase service levels to meet the demand for adult education in the state of California;
- Improve programming to better prepare students for postsecondary education and/or transition to the workforce;
- Provide adequate academic, social, and financial supports for all students to lower barriers to enrollment and promote student success;
- Align assessments for placement between the K-12 Adult and community college systems to help students' achieve their educational and career goals;
- Develop a common accountability approach for documenting student progress; and,
- Maintain and extend structures for ongoing regional coordination among adult schools, community colleges, and community partners.
