Our Mission

To offer quality, convenient, and affordable enrichment and professional development classes to our community of lifelong, and diverse, learners. To fulfill Diablo Valley College's Mission Statement commitment to promoting "personal growth and lifelong learning."

Community Education

CELEBRATING 85

WHAT MAKES DVC UNIQUE &
SHOWING IT OFF TO OUR COMMUNITY

DVC has excellent facilities, resources, plus a gorgeous campus that should be made available to our community. **Empty classrooms are missed opportunities for DVC to engage with our community.** After all, it is their tax dollars and votes that support DVC's mission and programs.

This year, it was a privilege to share three wonderful DVC facilities with the community.

This past year, CE hosted two, culinary community classes in DVC's state-of-the-art demo kitchen. Here's a quote from an attendee:

Denise Lawry, a member of the audience said the experience was "beyond my expectations."

A total of eighty-five community members have enjoyed learning about tapas, Spanish culture and tasting freshly prepared tapas from guest chef, Oscar Cabezas of Teleferic Barcelona in Walnut Creek.

DVC Art Gallery

DVC has a wonderful Art Gallery with Arthur King at the helm.

In 2017, we opened the gallery's doors for an evening event for CE (pictured above). There was a nice mix of 40 attendees, including a mother and her children enjoying the art pieces together. Talented DVC classical guitar student, Ken Del Valle, played throughout the evening.

DVC Planetarium

In fall of 2017, DVC faculty Paul Sasse, led a community show in the Planetarium for Community Education.

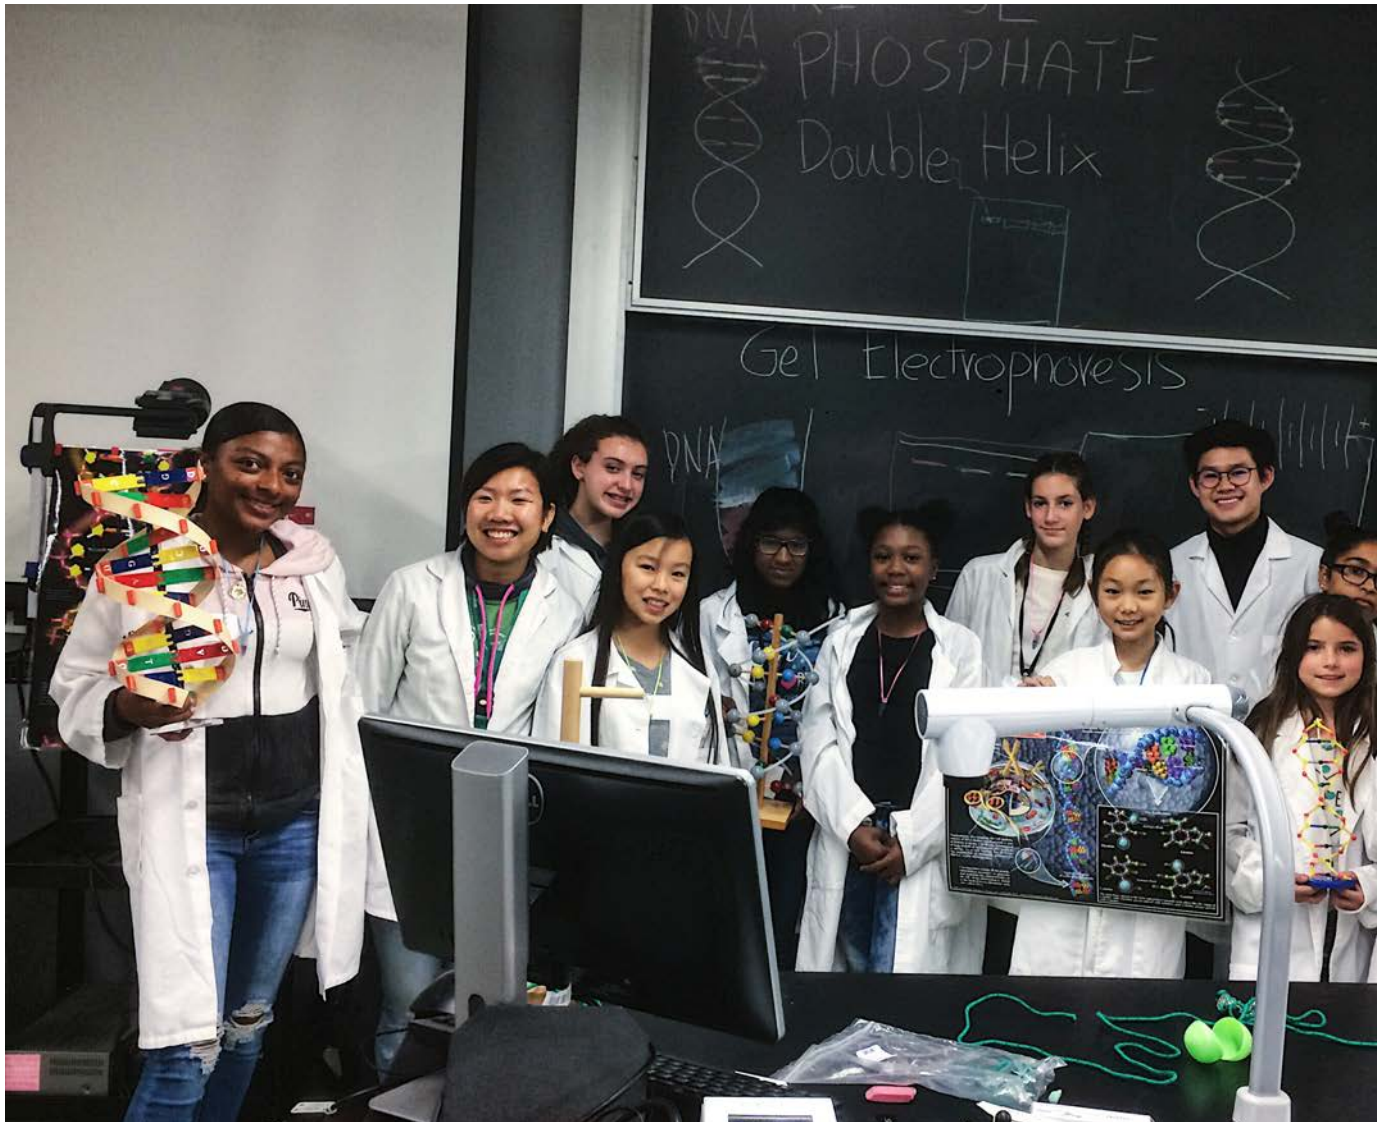

This first show was filled to capacity with 40 attendees.

This fall another Planetarium show is scheduled and it is filled to capacity again with 40 community members registered!

DVC faculty, Ray Faulkenberry shared this after the Art Gallery event, "My wife and I very much enjoyed the music, art, and refreshments... It made for a wonderful start to our evening."

Youth Programs

Expanding Your Horizons

Community Education was delighted to host the annual Expanding Your Horizons STEM conference for middle school girls. We had 86 girls and 10, hands-on, STEM workshops. Workshops were mostly led by DVC faculty and included:

- Hands-On with 3D Printers
- Crime Scene Investigation
- GIS Technology
- Jewelry-Making with Chemistry

YOUTH PROGRAMS

spotlight

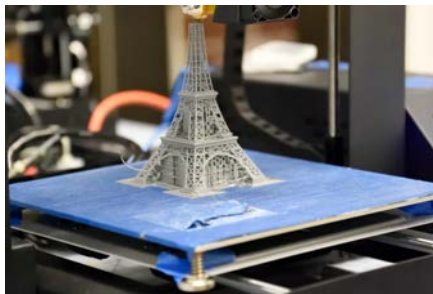

3D Computer Modeling & Printing

Community Education owns 3D printers and has offered 3D computer modeling & 3D printing classes for youth.

Three, one-day, classes have been offered so far with a total of 57 students enrolled.

Over the past two summers, over 200 students, grades 6th - 9th, have participated in this class through CFK.

200+

Introduction to MATLAB & 3D Plotting

27

Twenty-seven, 6th - 8th grade students enjoyed a one-day class on MATLAB, a software used in Artificial Intelligence and Aerospace. This is a great example of taking a software already installed on DVC computers and making it available to youth to gain a better understanding of skills needed to compete in an ever-changing technological world.

COLLEGE FOR KIDS

Celebrating 30+ yrs!

DVC's signature program, College for Kids, continues to inspire and engage the next generation of lifelong learners.

Classes range from watercolor to coding to math to writing and more! Students range from grades 4th - 9th and come from different socio-economic, ethnic and racial backgrounds.

Classes are offered at the Pleasant Hill and San Ramon campuses.

JOURNALISM ROCKS!

spotlight

Teaching the Next Generation of Journalists

A returning summer hit, Journalism Rocks!, paired 7th-8th graders with a former local magazine publisher, Charleen Earley.

Over three weeks, Charleen taught her team the rules of journalism and how to put together a magazine.

Four, unique, magazines have been published over the past two summers with a total of 32 journalist students.

32

EMERITUS

THE LIFELONG LEARNERS

Emeritus continues its 20+ years of service to our community of lifelong learners. This year we served over 674 learners in topics ranging from history, religion, music, science and art at DVC Pleasant Hill, Rossmoor and John F. Kennedy University.
