DEMO Course - Student Orientation

This Student Orientation provides an overview of our basic course structure, course materials and course completion requirements. It provides a list of frequently-asked questions to assist you in quickly identifying the information you need during your studies. This course also reviews the role of your course mentor, how to use the classroom messaging system, and steps to manage your account profile and password. You will be able to access this course at anytime during your studies.

After completing this course, you should be able to:

- Comprehend the basic structure of a course and the requirements to complete a course
- Identify the basics for accessing course textbooks and course resources
- Comprehend the basics of logging into and navigating the classroom
- Identify who to contact for various student needs
- Understand that all communication with mentors should be within the classroom messaging system to keep a history of messages
